

# NEW LASER METHANE DETECTOR WITH DATA STORAGE FEATURE SA3C06A

## LaserMethane

### Capable of Detecting Methane Anywhere in an Easy and Accurate Way.

#### ● Remote measurement and detection

Capable of measuring and detecting methane from a distance of 150 m max. and even through a glass window.

#### ● Excellent methane selectivity

Reacting only to methane, thus making it possible to perform accurate measurement and detection of methane.

#### ● High-speed and high-sensitivity measurement and detection

With an optical measuring method, high-sensitivity/high-speed response (0.1 sec) is possible.

#### ● Excellent portability

Operated by compact and light-weight battery, it is portable anywhere.

#### ● Graphic display of measurement results

Provided with a liquid crystal display for graphic display, it is easy to see the measurement results.

#### ● Storage and editing of data by PC

Provided, in addition to a built-in memory, with an SD card for excellent linkage with external devices.
